

### My Work This Term

#### SEMH & HG

This term I have had children from Year 1 to Year 6 doing different activities based on their tasks. The SEMH groups were focusing on developing resilience in themselves and as a team whereas, the HG groups were focusing on developing balance for a period of time. Due to cover issues, going on trips and a generally busy term, I haven't been able to record the most consistent results therefore, unlike other terms the results have not been recorded. Instead, students have been working individually on their performance each time that I have taken a group out.

#### COMMONWEALTH GAMES

This term has fast approached, with the Commonwealth and the Wolverhampton games starting to kick off. With both of these events happening, we as a school have entered competitions designing logos and creating posters for our athletes. Our school is also taking part in the Commonwealth Games Baton run, we as a school have organised lots of things in order to receive the "Baton" and then take it to our next destination. We have created T-Shirts which has been customised by Staff, containing our school name as well as the flag of the country we are representing (SRI LANKA). We have also crafted some mock "torches" to take with us as we run to our next destination.

#### INTERHOUSE COMPETITIONS

We have also held the inter-house rounder's competition, which will be our Year 6's last inter-competition ever, as they leave in September! We hosted this on the field where they worked in their respective houses against each other to try and compete for the title. Here are some pictures of the Year 6 children in full rounder's spirit.

The inter house competition ended with St. Edwards house winning, well done to everyone involved!

**COOKING & THEORY**

This term was limited on cooking sessions, we managed to get some interesting and new ones. With Year 6 pupils this term, we managed to first of all make some bread, which was then sold served with Jam or butter to other children. Here's a picture of our mix!

Here the children are mixing together the dough, ready to roll out with flour to end up with some lovely bread rolls!

As well as this, children in Year 6 explored media factors and the impact it had on food. The children found different types of media that advertised different foods, from either watching or seeing them. They then explored the desired effects of the adverts and how it could affect our food choices. They then came up with different ways which they thought would be good advertising.
